Math Problem Solving

Solve each problem below, showing **ALL** your work, even if you are able to solve the problem in your head. Try using more than one strategy to find the answer, using numbers, pictures, charts, or any other method to solve the problems. Once you have found the answer, try checking your solution.

Priscilla Pig loves pink. Everything she has is pink. She just built a brick wall and she is going to paint it pink. The wall has 14 bricks across and is 11 bricks high. She is going to paint all sides of the bricks that are facing out. How many sides will Priscilla have to paint?

Solution: _____

Put the yuk, ugh, bah, ick, and glok in order from biggest to smallest.

- A yuk is bigger than an ugh
- A bah is not the smallest
- A yuk is not the biggest
- Only one thing is less than an ick.
- A glok is more than a bah.
- More than one thing is bigger than a bah.

Solution: _____

There were 20 problems on a math test. Each correct answer earned five points. Two points were deducted for each wrong answer. Lenora got 72 points. How many correct answers did she have?

Solution: _____

Your plane leaves at 9:15. You have to arrive at the airport two hours before your scheduled departure time. It takes 45 minutes to drive to the airport. What time do you have to leave home?
